

A beautifully crafted interface enables people across different parts of your business to easily create and manage sophisticated web content. Open standards ensures your multilingual, content-rich, SEO-enhanced websites can grow with you. Comprehensive features deliver critical services to your ever-demanding audience. Welcome to a new kind of Content Management.

**Streamlined User Interface.** Increase efficiency immediately with the best interface on the market, designed by usability experts.

**Universal Search.** Finding content in Amaxus is simple. The shortcut enabled, predictive Universal Search locates your content in seconds.

**Cross Browser.** PC, Mac, Firefox, IE or Safari. You choose.

**Enhance your Google Rankings.** A unique, integrated SEO checker, beautiful editable URLs, standards compliant output and automatic page inter-linking.

**Monitor and React.** A library of real-time widgets lets you quickly react to CMS, website and web server activity. Create and share widgets with the Amaxus community and download them to your OSX or Windows desktop.

**Tools that Really Help.** Integrated, real-time reports enable your authors to easily create accessible, consistent, SEO-optimised content.

**Stay efficient with Shortcuts.** Amaxus is the first CMS designed for optimum flow. Organise content into projects, drag commonly-used content and pages into the bookmarks widget to create shortcuts, access menu items through keyboard shortcuts, reuse content and templates, and much more.

**Incredible Performance.** Taking advantage of the latest software developments and with specific support for recent advances in hardware, Amaxus outperforms most of the CMS market.

**Harness the Cloud.** One of the first Content Management Systems to be developed with core support for the Cloud, bringing you all the benefits without the complexity. Scale up or down in minutes, create multiple development and test environments with the touch of a button, and take advantage of 'Virtual Return-to-Base' functionality.

**Rapid Development Environment.** A CMS framework designed specifically for rapid, high-quality, modular development. Amaxus includes a suite of tools to assist you and supports risk-free development in a sandboxed virtualised environment.

**Do It Your Way.** With a choice of API options, develop sophisticated new features with REST calls or go straight into the PHP 5 Object Interfaces. Get creative on the front-end with either XSL or new PHP templates.

We would love to take you through a personalised demonstration of Amaxus. Get in touch today.
